

The 11 Forgotten Laws - Powerful Principles to Change Your Life By Erene W.

Bob Proctor is a highly reputable personal development and professional coach who has helped numerous people to achieve great success in life. His books have reached worldwide, extending the knowledge of the law of attraction and mind power for achieving great success to millions of people. In Bob Proctor's recent work, he has asserted that besides the law of attraction, there are additional laws that exist in the universe, which he calls 'The 11 forgotten laws'. In order to embrace a life of success and happiness, these 11 forgotten laws need to be understood. These laws work the same for everyone, at anytime and at everywhere. People can live a fulfilling life achieving what they want to achieve if they live in harmony with these laws.

Law 1: The Law of Thinking

The law of thinking dictates that we can only attract what we think. By changing your conscious thought patterns, which is your ruling state, you will allow yourself to effectively change the result to what you want. How far a person can go or how great the success a person can have, depends on the thinking. In order to achieve big success, a person has to think big. When you think success, you will attract success.

Law 2: The Law of Supply

The law of supply depicts that the universe is a source of unlimited supply. It is enough for everyone. If we focus on abundance, our feeling, emotions and actions eventually attract abundance into our life. It is possible to achieve success in any area you are doing if you release yourself from the belief of scarcity. The universe does not restrict or limit on what we could achieve, but we do if we allow it.

Law 3: The Law of Attraction

The law of attraction essentially is about what we focus, we will attract. Everything we experience in our life is dictated by our own mindset. If you're a positive thinker, the universe will respond in harmony with you and you will get what you desire. So, it is important to just focus on thinking about what you want and get emotionally involved to attract it into your life.

Law 4: The Law of Receiving

The law of receiving works hand in hand with giving. We must give in order to receive. However, we need to let go and not being attached to what we want to receive too obsessively. We need to trust the universe will somehow give us what we want and all we need to do is to be ready to receive it. How much we receive will be limited by how much we allow it.

Law 5: The Law of Increase

The law of increase is about being happy and being grateful for what we have now. At the same time, we need to have faith that we can grow and have more of it. The key to this law is to feel grateful, to praise for the good things and amplify the positive things that we have in life. The more you appreciate and look at the good sides of things, the more you will reap. This is because as you are appreciating the good things, you build yourself the momentum to move ahead to get more and more in life.

Law 6: The Law of Compensation

This law is all about space or vacuum. According to Bob Proctor, universe fills up the empty space or vacuum with the things that we desire, but first we will need to create a space for it to happen. We need to constantly focus and energize the good things in order to get the outcome that we

want to achieve. The invisible energy of the thinking substance that we radiate will be heard and we will get what we want.

Law 7: The Law of Non-Resistance

Every thought has a frequency. The less you resist on something, the less it will exist. By devoting less attention towards fighting the unwanted thoughts and conditions, you will find that the problems that you face become less and less pervasive. In pursuing success, you'll encounter resistance along the way. By not focusing on the resistance, you'll eventually achieve the success that you want.

Law 8: The Law of Forgiveness

The law of forgiveness states that we must learn to accept our own mistakes and letting go of it completely. We've got to realize that even if we did something wrong or someone had done something bad to us, we can't always hold to it. We need to learn to forgive ourselves and others because we will not be able to move into a good direction if we are holding back to these bad thoughts.

Law 9: The Law of Sacrifice

The law of sacrifice is to give up something that is of a lower nature for something of a higher nature. For example, in order to enjoy extraordinary success in life, we have to sacrifice our time, put in the effort and be disciplined to work for what we want to achieve. We have to be persistent and persevere to work on what we want in order to achieve it.

Law 10: The Law of Obedience

When we understand the laws and live in harmony with the laws in our daily life, we could achieve great success. When we obey to the laws, we are governed by the nature order which automatically removes all the challenges and obstacles for us along the way. With the nature order, universe will answer to us, for every need that we want.

Law 11: The Law of Success

The law of success states that everyone is born to succeed. We have the power and capacity in each of us to be great and to achieve massive success. We need to properly develop it from our inner world in order to have it in our outer world. We need to work from our spiritual thoughts, work on the non-visible energy to see the manifestation happen in our physical life.

In conclusion, it is important to live in harmony with the universal laws so as to ensure that we are governed to achieve great success and happiness in life.
